

# REHAN MHATE

## Aspiring Software Developer

+917020010263   @ rehanmhate@gmail.com   github.com/rehan-08   Mumbai, India

## EXPERIENCE

### Front-End Developer (Internship Seeking)

#### Self-Initiated Projects & Learning

01/2024 - Present   Remote

Currently seeking internship opportunities and improving front-end development skills

- Building responsive web pages using HTML, CSS, and JavaScript, while progressing through the freeCodeCamp curriculum
- Gaining familiarity with basic Excel, including formulas, data entry, and spreadsheet organization
- Focused on writing clean, accessible, and beginner-friendly code as part of personal growth

### Grid-Based Game Developer

#### Personal Collaborative Project

09/2024 - 12/2024

Team project focused on game development

- Co-developed a grid-based terminal game using C programming, featuring player movement, item collection, and collision logic
- Handled game logic, input handling, and memory-safe practices using functions and modular code design
- Collaborated with teammates on logic flow, testing, and improvements in a structured, team-based workflow

### Python Projects (Basic Level)

#### Self-Directed Learning

01/2025 - 05/2025

Working on various Python projects to improve programming skills

- Completed several beginner projects in Python, including simple scripts and small applications to practice programming fundamentals
- Explored concepts like loops, conditionals, functions, and data structures (lists, dictionaries)
- Focused on problem-solving and writing readable, maintainable code

## EDUCATION

### Bachelor of Engineering

#### Mumbai University

08/2024 - 05/2028   Mumbai, India

## SUMMARY

I'm an aspiring Software Developer based in Mumbai with a growing understanding of HTML, CSS, and JavaScript. Currently, I am enhancing my skills through freeCodeCamp while actively participating in self-initiated projects and team collaborations. I have basic proficiency in Excel and a readiness to integrate into a professional setting. Eager to learn and contribute to innovative projects

## STRENGTHS

#### Communication Skills

Excellent communication skills and ability to collaborate with team members effectively

#### Adaptability

Strong adaptability to new tools and technologies in software development

## SKILLS

C/C++

CSS

Cybersecurity

Data Structures

Encryption

Forensics

GitHub

HTML

JavaScript

Log Analysis

Microsoft Excel

Modular

Python

Spreadsheets

Gmail

Responsive Web

## TRAINING / COURSES

#### Cybersecurity & Digital Forensics Training

Completed a course focused on Cybersecurity fundamentals and Digital Forensics. Learned basics of secure coding, password handling, encryption, and attack vectors. Gained exposure to forensic techniques such as log analysis and system behavior tracing
